

Accident Investigation

The session teaches you the meaning of an accident and why accidents must be investigated. The accident investigation program course provides training and instruction in how to properly identify the immediate causes and more importantly underlying root causes.

Effective workplace accident investigation will provide you with the tools necessary to follow up and provide pertinent information to your company management and the Workplace Safety and Insurance Board so that every precaution possible is taken to eliminate the root cause of the accident/incident at your workplace.

The employer will receive a certificate of completion for every participant in attendance.

What the participant will learn:

- Legislation
- Definitions
- Understand that investigating incidents is important to prevent future losses from occurring.
- Provide form and instructions for a step-by-step accident investigation program.
- Provide the information for reporting of findings to the appropriate parties.

Evaluation:

- Quiz and interactive group work is part of the training.

Who Should Attend:

- Human Resources Managers, Managers, Supervisors, Lead hands, Joint Health & Safety Committee Members and Health and Safety Coordinators.

Course Length:

- Half day

YOUR BUSINESS IS IMPORTANT TO US!
