

CONFINED SPACE

SAFETY CONNECTION provides information and instruction to familiarize participants with examples of confined space and provide an overview on the subject of confined space. In addition, the course identifies areas, which pose risk, and recommends corrective action and controls.

What the participant will learn:

- Familiarize participants with relevant legislation, standards and guidelines which apply to confined spaces
- Provide an overview on the subject of confined space safety including permit
- Identify areas which may cause injury or illness
- Describe ways of controlling the hazard including lockout
- How to prepare an action plan to identify, assess and control the hazard based on an actual workplace situation

Instruction:

- Presentation by a qualified instructor
- Group discussion
- Interactive group involvement
- Videos
- Written evaluation
- Confirmation of Training/Record of Training

Who Should Attend:

- All employees who have to work in a confined space
- All employees who must supervise a person who works in a confined space
- Lead hands/Supervisors/Managers who want to have a knowledge base for instructing employees in confined space safety.

Course Length:

- 3.5 hours
- Course materials and certificates provided
